- 1. Click on "Tools"
- 2. Notice the area highlighted in red within the screen shot below the 4th item in these instructions.
- 3. If there is a "check mark" next to "Compatibility View" click on it to remove the "check mark"
- 4. Next, Click on "Compability View Settings"

- 5. Make sure there is **NOT** a "check mark" next to:
 - "Display all websites in Compatibility View"
 - "Display intranet sites in Compatibility View" as shown below.

6. The settings should look like the window below when you have completed step 5.

- 7. Click on "Close"
- 8. Refresh the site or close the internet browser and then open it up again.
