Community Sustainability Award

Alison Tamborlane & Michel Scheffers - Home Sweet Home

From pollinator-friendly landscaping to energy audits and sustainable DIY projects, Alison Tamborlane and Michel Scheffers work every day to make their home more sustainable. They share water and energy conservation tips with their neighbors and created the “Big-Time Gardening” newsletter to share gardening tips with family and friends. Alison and Michel consistently

have low energy and water usage for a home of its size, and they advocate for making sustainable changes to their HOA and Design Guidelines Review Committee’s guidelines. Their dedication to sustainable living, neighborhood outreach and organizational leadership showcases the impact one cheerful and committed household can make in their community.

Project Achievement Areas:

Energy, Water & the Built Environment
