

# City of Lakewood Sustainability Award 2009 Community Sustainability

## Sustainability

"creating balance among the environment, the economy and society to ensure that we do not compromise the quality of life for future generations."

- Lakewood's  
Comprehensive Plan

## Belmar Solar Parking Structure Continuum Lakewood Development Company

### Project Achievement Areas:

- Climate Change
- Innovation in Environmental Technology
- Green Design

The Belmar solar parking structure project features a 1.75 megawatt solar system constructed on three parking garages at the Belmar mixed-use development in downtown Lakewood.

The project was installed by SunPower using more than 8,000 photovoltaic solar panels. The system will generate approximately 2.3 million kilowatt hours of electricity per year. This will offset 5% of total power consumption at Belmar.

The City of Lakewood is proud to recognize Continuum Lakewood Development Company as a 2009 Community Sustainability Award Recipient.
