DEFENDER OF THE PLANET

Addison Brigner

Bonnie Plant 3rd Grade Cabbage Program

Glennon Heights Elementary School

As part of the **Bonnie Plants 3rd Grade Cabbage Program**, Addison Brigner cared for her cabbage plant all summer. When Addison, a student at Glennon Heights Elementary School, finally harvested the cabbage, it weighed almost 8 pounds. The experience taught Addison about the source of her food, and as a result, she has now started caring for ducks in order to have her own eggs. A member of 4-H, Addison will be showing her ducks in August, so every day she wakes up early to help collect eggs and provide fresh water and food to her ducks.

Addison is truly learning where her food comes from and gaining an appreciation for the hard work required to care for and grow healthy sustainable foods.

Project Achievement Area

- Community Health & Engagement
- Economic Sustainability
